Hudson Neuro Center & Sleep Lab

The Hudson Neuro Center is a regional office of Neurology and Neuroscience Associates (NNA), which has been providing comprehensive neurological care in northeast Ohio since 1972.

Hudson Neuro Center's team of specialty-trained physicians, nurse practitioners and medical staff are committed to compassionate care and quality service.

Our team—utilizing the latest innovative technology in diagnostic procedures and most advanced medical therapies—provides a comprehensive continuum of care from diagnosis, individual treatment plans and education to the rehabilitation of neurological conditions.

General neurology services

NNA offers complete evaluation, diagnosis and treatment of neurological disorders including stroke care and prevention, Alzheimer's disease, multiple sclerosis, dementia, back and neck disorders, Parkinson's disease, migraines and headaches, epilepsy and seizures, sleep disorders, neuropathies and neuromuscular disorders.

Neurodiagnostic testing lab

For the convenience of patients and referring physicians, our fellowship-trained physicians and certified technicians perform EMG (electromyogram), nerve conduction study and EEG (electroencephalogram) tests in our Hudson office.

Neurodiagnostic consults by our physicians ensure the most appropriate and effective tests are ordered. Or, the referring physician may directly order tests.

Testing with our state-of-the-art equipment generally is scheduled within one week. Timely reports are generated by our staff for the referring physician.

Advanced MRI Services

Our Hudson office's Advanced MRI Services are fully accredited outpatient MRI facilities. Registered MRI technologists provide comprehensive examinations including total body, extremity, neurological and specialty imaging. Board certified radiologists or neuroradiologists interpret results.

Sleep studies and treatment for sleep disorders

Managed by Neurology & Neuroscience Associates and board-certified sleep physicians, Ohio Sleep Disorders Centers at the Hudson Neuro Center is accredited as a full-service sleep-disorders program.

Dedicated to the comprehensive treatment of sleep disorders, our outpatient sleep center provides daytime and nighttime diagnostic sleep studies in comfortable, private bedroom settings using the newest technology.

Neuropsychological assessments and testing

Neuropsychological assessments and testing are available in our Hudson office. We measure a patient's cognition, mood and personality along with strengths, weaknesses and functionality.
